Omega has been around since the mid-19th century and has earned a reputation for making reliable, precise, and functional watches. Omega has a long, rich history of developing new watchmaking technology. They created the co-axial escapement as well as an especially effective form of protection against magnetic fields. Such innovations help protect Omega watches against jolts and magnetic ...

Lateral flow assays are rapid, simple, allowing point-of care testing. Due to these features, they

were commercialized and used in the field of health. These advantages also explain their success in clinical diagnostics. By using lateral flow assays in analysis, the time spent for test results is reduced from hours to minutes.
