Characteristics and Behavior of Owls | Carolina.com

Animal testing, also known as animal experimentation, animal research and in vivo testing, is the use of non-human animals in experiments that seek to control the variables that affect the behavior or biological system under study. This approach can be contrasted with field studies in which animals are observed in their natural environments or habitats.

Animal testing - Wikipedia

a brief description of how those procedures are likely to affect the biology and ecology of the study animals by describing the relationship of that species to the habitat and to other species found in the study area (including the nature and duration of potential effects); and ... perch on, or nest in contribute to, rather than detract from ...
