Characterization of ex ante fairness Seiji Takanashi April 13, 2017 Abstract We examine how ex ante fairness is characterized with the social preferences. If we extend the social preferences to risky situations, there is a problem that ex ante fairness is inconsistent with ex post fairness. Ex post fairness is expressed by the expected utility ...

In particular, we are able to achieve ex-ante group fairness (Conitzer et al., 2019), which generalizes both envy-freeness and Pareto optimality, in conjunction with two ex-post fairness properties that are incomparable but are both implied by EF1: proportionality up to one good or Prop1 (Conitzer et al, 2017) and envy-freeness up to one good ...

However, we show that economic efficiency and ex-ante envy-

freeness can be simultaneously achieved if we slightly relax our ex-post fairness guarantee. On our way, we characterize the well-known Maximum Nash Welfare allocation rule in terms of a recently introduced fairness guarantee that applies to groups of agents, not just individuals.

We present a polynomial-time algorithm that computes an ex-ante envy-free lottery over envy-free up to one item (EF1) deterministic allocations. It has the following advantages over a recently proposed algorithm: it does not rely on the linear programming machinery including separation oracles; it is SD-efficient (both ex-ante and ex-post); and the ex-ante outcome is equivalent to the outcome ...

In settings with uncertainty, tension exists between ex ante and ex post notions of fairness (e.g., equal opportunity versus equal outcomes). In a laboratory experiment, the most common behavioral pattern is for subjects to select the ex ante fair alternative ex ante, and switch to the ex post fair alternative ex post.

Later work has studied both ex-ante and ex-post fairness and efficiency guarantees provided by mechanisms in this setting [1, 10, 17, 30], but most of this work studies ordinal utilities and does not consider approximate notions of ex-post fairness. 2 Gajdos and Tallon [23] study the relationship
