ISO-GUIDE 35 | Reference materials - Guidance for ...

ISO/Guide 35 explains concepts and provides approaches to the following aspects of the production of reference materials: - the assessment of homogeneity; - the assessment of stability and the management of the risks associated with possible stability issues related to the properties of interest; - the characterization and value assignment of properties of a reference material-</P> </P> the ...

ISO 17034, 17025, and 9001 Explained - Inorganic Ventures

— ISO Guide 35 provides more specific guidance on technical issues and explains the concepts for processes such as the assessment of homogeneity, stability and characterization for the certification of RMs.

ISO Guide 35:2017 - Estonian Centre for Standardisation

Guide 35 is a normative reference for Guide 34 indispensable for the application of this document, 4.1.2 Quality policy - The quality policy shall include but shall not be limited to the following commitments: b) to produce, where applicable, certified reference materials according to the requirements of ISO Guide 35 and accompanied by certificates meeting the requirements of ISO Guide 31;

ISO Guide 30 / Guide 31 / Guide 33 / ISO 17034 / Guide 35 ...

Furthermore, the Certificate of Analysis must adhere to the requirements established by ISO Guide 31. Bottom Line: ISO 17034 provides the highest level of quality assurance, confidently stating that the manufacturer's standards are produced correctly and competently. Inorganic Ventures is accredited to all three of the above certifications.

ISO Guide 35 : Reference materials – Guidance for ...

Homogeneity assessment of reference materials is discussed with particular reference to the recommendations given in ISO Guide 35. It is suggested that Guide 35 could be improved by the addition of a wider range of experimental designs, and by using statistical power calculations to improve the recommendations for design of experiments for homogeneity assessment.

ISO Guide 35: Reference Materials - NIST

ISO Guide 35:2006 explains how methods can be developed that will lead to well established property values, which are made traceable to appropriate stated references. It covers a very wide range of materials (matrices), ranging from gas mixtures to biological materials, and a very wide range of properties, ranging from chemical composition to physical and immunoassay properties.

(PDF) Outline for the revision of ISO Guide 35

This type of activity is covered in ISO Guides 34 and 35. The development of working standards, as used in, e.g. natural gas analysis, clinical chemistry, and the pharmaceutical industry is not covered in this Guide.

ISO - ISO Guide 33:2015 - Reference materials — Good ...

Guide 34:2009 sets out the management system requirements in accordance with which reference materials shall be produced. It is intended to be used as part of a reference material producer's general quality assurance (QA) procedures. Guide 34:2009 covers the production of certified and non-certified reference materials.
