An international giant in clinical neuropsychology and an inspiration for Oliver Sacks's narratives, Luria helped pioneer the study of the individual patient as interesting bridge between normal and abnormal psychological processes rather than studying animals in a maze, or groups of humans in an experimental setting. His "N of 1" close readings remain fascinating reading today, including ...

Unexpectedly, mnemonist savants did not exhibit a better performance than control persons. On the contrary, controls outperformed mnemonist savants in the recognition of pseudowords. Obviously, the task to recognize standardized stimuli in an old-new paradigm did not match the abilities of our mnemonist savants.

Words suggested images and these got him lost in such things as poetry. So initially he would take walks and use the memory palace method in his mind. Once he became a mnemonist, he needed a better way to recall things, so he started to make a visual shorthand. In any case, this book was a quick read and quite enjoyable. ()

A fine memory book. The Mind of a Mnemonist is not written as a fictional account of a person named "S". Non-fiction might be where the beauty lies. Aleksandr Romanovich Luria is a Russian psychologist. The mnemonist "S" is a Jewish man. S. is studied under a 30 year period. At the beginning of study, S. is under 30 yrs of age.
