Vivitar was a big player in the market a long time ago. The Vivitar 283, 285, and 285HV have been trusty photographer's assistants for a long long long time, most especially in the days before flashes had all sorts of automated features. Since it's heyday, Vivitar has gone out of business and been picked up more than once.

VIVITAR 283 OWNER'S MANUAL Pdf Download.

The Vivitar 283 electronic flash features bounce flash for softer, more professional-quality lighting. The Auto Thyristor circuitry has a fast recycle time and a high number of flashes per set of batteries. Additional features include autocheck, a sufficient-light indicator, and an illuminated calculator dial.

Vivitar 283 Flash Review - Ken Rockwell

Why does Vivitar 283 and 285 Lie about their Guide Numbers? Vivitar 283 and 285 Strobe Flash units claim 120 GN using 100 ISO it is realy GN 34.4 Studo Strobe Flashes vary from one Company to another 42GN is measured in Meters 10 Ft = 3.048 Meters

Why does Vivitar 283 and 285 Lie about their Guide Numbers ...

Flash Guide Numbers. Flash guide numbers will help you calculate f-stops for exposures using the manual position or when you bounce your illumination. Measure the flash-reflector-subject distance, and divide the total into the Flash Guide number listed for the ASA film you are using. Round off the result to the nearest f-stop and open one stop ...

Vivitar 283 Flash Guide Number

In 2012, I measure the actual light output of my Vivitar 283 as Guide Number 45 in feet at ISO 100, which is one stop less than its rated GN 64. This is typical for all flashes, and not bad for a 1970s flash tested in 2012. While rated for a 7-second recycle time, I measure only 4 seconds to ready-light on with Sanyo AA Eneloop.

Which Flash Unit For A1 and AV1 | Photo.net Photography Forums

In 2012, I measure the actual light output of my Vivitar 285 as Guide Number 45 in feet at ISO 100, which is one stop less than its rated GN 64. This is typical for all flashes, and not bad for a 1970s flash tested in 2012. While rated for a 7-second recycle time, I measure only 4 seconds to ready-light on with Sanyo AA Eneloop.

cameras:: Vivitar 283 Flash; - from the other Martin Taylor

Guide number 138' at ISO 100 and 85mm. Accepts any 6v-3a external power pack for faster recycle time and more flashes. Five auto f/stop settings for controlling depth-of-field and maximum auto flash range. Zoom flash head has seven positions for covering 24 mm, 28 mm, 35 mm, 50 mm, 70 mm, 85 mm and 105 mm camera lenses.

Flickr: Discussing vivitar 283 with varipower module ...

The flash has a guide number of 140 (ISO 100, "tele" 105mm zoom position -- i.e. with the head/sleeve pulled all the way out -- in feet), which puts it at the low end of similar-sized units like the Sigma EF-500DG Super (GN 165), Canon 580EX (GN 191), and Nikon SB800 (GN 184).

Vivitar 283 Demo

small flash, but a big one is likely to get left behind when travelling. Finally, the Vivitar 283 is a good flash, so good that it was in production for something like 20 years, but some people claim that the high trigger voltage of the oldest versions can fry a camera's electronics.

Vivitar 385HV Flash VIV-385-HV B&H Photo Video

Unfortunately, your 283 doesn't work that way, ie. 1/2,1/4, etc. , or at least mine doesn't, it works using flash to subject distance in f/ stops. At full power your guide number at 100 ASA is 110, at ASA 400 your guide number is about 220.

A Concise Guide to the Vivitar 285 and Vivitar 285 HV and ...

The 283 is powerful for it's compact size but sometimes its power is over stated. I'm sure its guide number of 110 is a little optimistic. It is powerful enough for most situations and with some understanding of how to setup and use its thyristor settings it is still useful as an on camera flash.

Vivitar 283 Flash Flashes user reviews : 4.1 out of 5 - 40 ...

This flash has four automatic ranges, which allows for automatic operation with a choice of four aperture settings with your camera. With a guide number of 110, it can pack quite a punch for its compact size. The head of the Vivitar 283 tilts up to 90 degrees to allow for easy bounce lighting that will eliminate harsh shadows in your photography.

Vivitar Flashes Quick Guide - Help Wiki

In this environment, the 283's ASA 100 Guide Number of 120 is adequate to bounce the light off the Ceiling. In my opinion, this gives a much more natural and richer look to the image than the usual direct-flash, where the flash aims straight at the subject with all the flattering lighting quality of a headlight.
